## PUBLIC HEALTH EXPERIENCE

<b>Senior Public Health Advisor</b> Minnesota Department of Health   St. Paul, MN	Mar 2020 - Present
<ul style="list-style-type: none"><li>• Provide project planning, operations, and management expertise to the Minnesota Department of Public Health's Covid-19 Contact Tracing Program.</li><li>• Collaborated with the Director of Infectious Diseases to create policies and processes for the implementation of the Covid-19 tracing team and integrated steps for program evaluation and continuous improvement.</li><li>• Partnered with instructional designers to develop high-quality, engaging online training materials to quickly train a team of 25 contact tracers in the Case Investigator Unit, reaching diverse community members throughout Minnesota to minimize the transmission of Covid-19.</li><li>• Track daily data on successful contacts and create detailed weekly reports to illustrate metrics.</li></ul>	

- Present weekly reports to the Director of Infectious Diseases on the reach and challenges faced by the Contact Tracing Team and quickly adjust processes to reflect the changing environment of the spread of Covid-19.

### **Public Health Program Supervisor**

Washington County Department of Public Health and Environment | Stillwater, MN

Jun 2017 - Mar 2020

- Supervised 8 staff members who process applications for the WIC program which serves nutritionally at-risk pregnant, breastfeeding, and postpartum women, infants, and young children.
- Investigated and resolved escalated issues that impacted family eligibility.
- Hired new staff members and taught in-depth face-to-face and virtual training sessions on program regulations and delivery.
- Streamlined the application process based on survey feedback from applicants which saved staff approximately 4 hours per week, allowing for increased outreach to families.
- Collaborated with multiple internal departments, healthcare providers, and community organizations to ensure that information and access to the WIC program was dispersed and administered equitably to all eligible residents.
- Tracked weekly metrics to show staff productivity and reach of program.

### **Intervention Specialist - Supplemental Nutrition Program for Woman, Infants, and Children, (WIC)**

Washington County Department of Public Health and Environment | Stillwater, MN

Jul 2015 - May 2017

- Created and edited effective informational materials for access across print and electronic media platforms to inform diverse community members about WIC program benefits and eligibility criteria
- Crafted materials in accordance with the Americans with Disabilities (ADA) accessibility guidelines using graphic design and publishing software including Adobe Create Suite, Photoshop, and Acrobat
- Collaborated with multiple departments to meet tight project deadlines for publishing.

### **Community Health Worker**

Greenview Health Services | New Brighton, MN

Jul 2014 - Jul 2015

- Guided community members, patients, and their families on steps to access appropriate community services and resources.
- Provided individual and group education sessions with up to 20 attendees on health management, disease prevention, and environmental safety awareness.
- Enhanced education materials, contributed to updating online information, and advised on how to change materials to be more culturally sensitive and inclusive.
- Advocated for increased funding for community organizations to ensure that housing, food security, environmental health issues, and public safety were considered as factors impacting community health.

---

## **MPH PRACTICUM EXPERIENCE**

### **MPH Practicum**

Wilderly Foundation | St. Paul, MN

Feb 2017 - Aug 2017

- Compiled and organized qualitative and quantitative research data for the Report on Improving Healthcare Access to Eliminate Health Inequities in Minnesota.
